

Sponsored Project

1. Project name	Review of Aquaculture Innovations in Asia
2. AIT Lead Faculty	Dr. Krishna R. Salin
3. Objective	To review and identify the successful application of aquaculture innovations in six selected Asian countries, namely, China, India, Indonesia, Philippines, Thailand, and Vietnam, and propose guidelines for their successful dissemination in the Asia Pacific region.
4. Short Descriptions	Innovation is critical to the Asia-Pacific region's rapid growth in aquaculture, which accounts for nearly 90 percent of global aquaculture production. This project, partnering with FAO, has reviewed some of the most successful aquaculture innovations in six selected Asian countries—China, India, Indonesia, the Philippines, Thailand, and Vietnam. Based on their potential for dissemination in Asia-Pacific, aquaculture innovations with socioeconomic and environmental benefits in improving farm productivity and supporting climate change mitigation and adaptation in Asia were highlighted.
5. Output/Social Impact	Several project meetings were held with partners from the six Asian nations, and a final report analyzing the aquaculture innovation framework in Asia and successful inventions for dissemination in the Asia-Pacific region was submitted and developed as a forthcoming FAO Technical Publication.
4. Partners	FAO
5. Donors	FAO
6. Project Duration	June 2020 – March 2021
7. Total grant amount	907,480 Baht
8. Please specify SDG s to which this project belongs	Poverty (SDG-1), hunger (SDG-2), employment (SDG-8), Innovation (SDG-9), sustainable production and consumption (SDG-12), climate action (SDG-13), marine and land-based resources (SDG-14 and 15)
