Student Exchange Program

Student Exchange Program offers an opportunity for AIT students to study and take classes in a partnering world-class university, so students at the partner universities will benefit from a full curriculum of academic knowledge, transnational skills, and cultural understanding and exposure. The exchange program is not limited to current students, and alumnae and alumnus also qualify for this program. The program is designed to provide a rich learning experience through an international education and to be an opportunity for students to develop expertise in their respective fields.

Exchange scholarships are available but are competitive. Exchange scholarships are designed to provide a rich learning experience through an international education and to be an opportunity for students to develop expertise in their respective fields.

Dr. Bindi Pandey (Class of 2002)

Management of Environment and Social Systems

I came to AIT because of the international environment provided at AIT. It is really a unique experience for me to take classes from so many outstanding professors. AIT has added to my understanding of the diversified fields of management. I have learned a lot of management knowledge, decision making and the ability to coordinate different people, as well as team building and team management. The classes were very challenging but the information I learned at AIT is valuable and useful.

Mr. Sopheap Sreng (Class of 2010)

USAID, Cambodia

Choosing to study at AIT was a unique opportunity for me to learn about global issues and sustainability areas that I was interested in. AIT's location in Bangkok allowed me to gain a greater understanding of Southeast Asia and its culture. The faculty members were very supportive and helped me navigate through the challenges of living and studying abroad. I enjoyed the multicultural environment and found it to be a valuable experience.

Ms. Xiaoming Tao (Class of 2014)

Project Manager, DFMT Consulting Co, China

The AIT experience was a unique opportunity for me to develop my skills in project management and leadership. The program provided me with the knowledge and skills to succeed in my career.

WHAT CHOOSE AIT?

OUTSTANDING

Social impact and innovation, supported by AIT's commitment to excellence and quality

INNOVATIVE

Strategic and systematic approach to learning various types of study, providing a strong foundation and competence

HANDS-ON

Learning through application in research, entrepreneurship, and society

NETWORK

Internationally recognized connections and opportunities for students from 100+ countries

CONNECTION

To access 150,000+ global alumni each year
Degrees Offered: Masters, Doctoral, Master of Philosophy, One Year Masters and Professional Masters

Technologies and Communication Department of Information Infrastructure Engineering and Engineering
